# Rainbow Facts

0 1 2 3 4 5 6 7 8 9 10

1. Player 1 rolls the die and moves forward on the board.
2. Player 1 must use the rainbow to help answer the question.
3. After correctly answering the question, Player 1 will then place a counter on either a yellow or purple circle.
4. If the Player answers incorrectly, they do not place a counter on a yellow or purple counter.
5. Play continues until a player has counters on all ten circles of their colour choice – either yellow or purple.
